Vision

Empowerment Through Education

BREAD's response during the emergency created by the unexpected lock down in the country following Covid 19 Pandemic.

When complete lock down was declared throughout India, in the month of March 2020 due to Covid 19 Global Pandemic and the series of repeated lockdowns that followed March, the country had witnessed a situation of panic, anxiety, health scares, job loss, daily wage earners and migrant labourers returning to their native places, people stranded, life threats all leading to an overall volatile environment and disruptive economic impact on the country.

Covid 19 Global Pandemic and it's first wave hitting India in March 2020 derailed BREAD's regular and major project Mary's Meals of feeding children at their place of education as schools remained closed, nevertheless BREAD recognized the need of the hour and charted out two-fold activities during the continuous lockdown.

- 1. Emergency Relief distribution.**
- 2. Dry Ration Distribution**

2nd Fold: DRY RATION DISTRIBUTION

After the first fold of Emergency Relief distributions BREAD with the help of Mary's Meals International moved on with dry ration distributions in different regions of Jharkhand state in each quarter, targeting Mary's Meals regular school beneficiaries, who were not able to attend school due to Covid pandemic and the extended lock down.

The poor beneficiary children, who, otherwise were getting one cooked meal in place of their education were not only deprived of their daily nutritional meal but also their education was hampered, moreover the financial situation of these beneficiary families had come to a standstill with most families' earning members losing jobs.

BREAD, assessing the need of the hour and with the support of MARY'S MEALS INTERNATIONAL, was able to keep up the promise of supporting the beneficiary children and their families by providing dry ration kit of 10kg Rice + 2 kg Lentil along with a bar of soap each, which not only ensured the beneficiary families with their children getting a proportion of their daily nutritional needs but also each round of distribution was a huge relief for 2-3 months period.
